---

## EDUCATION & CERTIFICATES

### Computer Programmer Diploma (CPD)

Seneca College, York Campus

**2017 - 2019**

Toronto, ON

### Bachelor of Engineering, Computer Engineering

Eastern Mediterranean University

**2013 - 2016**

North Cyprus

### SMILE Certificate of Achievement

Seneca College, York Campus

**2019**

Toronto, ON

### ABET Certificate

Accreditation Board for Engineering and Technology

**2016**

North Cyprus

---

## WORK EXPERIENCE

### Full Stack Software Developer

Fortress Technology Inc

**September 2021 - Present**

Toronto, ON

- Maintain and support multiple projects
- Introduce and develop new features to products
- Participate in debugging and bug fixes
- Produce clean, efficient code based on specifications
- Verify and deploy programs and systems

### Junior Software Developer

VelocityEHS

**May 2019 - September 2021**

Toronto, ON

- Created and configured applications for implementing SaaS solutions for clients
- Created dashboards, reports, notifications, web parts/widgets and components for the application using front-end (CSS, JS and JQUERY) and back-end (SQL, C#) tools
- Improved internal processes by creating standard reports, PDFs, imports, sites, and tools

- Investigated, diagnosed, and resolved system and programming issues

---

## PROJECTS

### Smart Brain Web Application

- **Experience** - Created a complex image recognition app using HTML5, CSS3, Bootstrap 5, JavaScript, React + React Hooks, Node.js, Express.js, NPM, RESTful API Design, SQL and PostgreSQL. As well as used third-party AI (Artificial Intelligence) Clarifai API to detect the face on the picture.
- **Application Summary** – The application allows users to register, sign in and upload any image and detect face if exists. In addition, users can update their information on the profile page including passwords. Furthermore, there is an administrator who has complete control of the application. The administrator can monitor the activities as well as delete, create, and update information about every user in the system.

### Expense Tracker

- **Experience** - Using HTML5, CSS3, JavaScript, and React + React Hooks created an expense tracker web application where users can manage their expenses.
- **Application Summary** – Using the application, user can add expenses that have name and cost, remove expenses, view the remaining budget, view how much they have spent, edit a budget, and search expenses. The application helps to have control over every expense and maintain healthy financial status.

### Immigration Guideline

- **Experience** - Using HTML, CSS, JavaScript, JQUERY, Bootstrap, SQL, and PHP created a web application that acts as a guideline for immigrants in the Russian Federation.
- **Application Summary** – The app was similar to the government website where users were able to stay updated with news, ask a question from an Immigration Officer, and get information regarding their immigration process.

---

## VOLUNTEERING

### SMILE Mentor

Seneca College, York Campus

Sept 2018 - April 2019

Toronto, ON

- Taught students the fundamental logic of programming
- Helped students learn to program in easy and fun way
- Helped students deal with issues in Academic areas
- Prepared and submitted monthly report about each student
